

suitable for small 4-6 inch wall installation speakers with a maximum installation depth of 105 mm!

Description

For brick and concrete walls

The wallboxx has been developed to allow a highly professional installation of in-wall speakers for brick- or concrete walls. Thanks to the front and rear MFP boards, the wallboxx will seamlessly integrate into your installation workflow, enabling a quick and easy processing of the walls surface. The body material is framed by EPS to achieve low resonances and improved sound insulation features.

Features and benefits

- modular and flexible product available in 6 sizes
- front and rear boards are made of MFP boards (15 mm)
- fix cut-outs allow for best possible handling of electronic ductwork (20 mm + 25 mm)
- lightweight and at the same time offers a robust stability with excellent shock absorption features compared to other systems
- our materials deliver a better audio reproduction when compared to other boxes that come in wood, sheet metal or plastic
- better insulation with airborne- and structure-borne noise compared to conventional in-wall systems
- Water absorbing protective lid

Included in delivery (per piece)

- 1 wallboxx S (B-5929)
- 1 protective cardboard lid
- 1 installation manual
- 1 cardboard packaging
